SUMMARY

I take a modern, pragmatic approach to building web applications — from UI design to CI/CD and server setup. I care about clean, maintainable code and thoughtful architecture. Always curious, I actively explore better ways to write software, guided by object-oriented design principles and long-term sustainability.

EXPERIENCE

Freelance Fullstack Developer | 2019 to now

EKM Metering

Work on performance, architecture, and feature delivery for priicer.com a RoR + React web app to help households optimize electricity usage based on wholesale prices. Integrate APIs and automated background jobs with Sidekiq.

Climate Media Factory

Designed and built the RethinkAction website using Jekyll and Netlify CMS, with a focus on content flexibility and maintainability. For the Climate Vulnerability Monitor, implemented a Gatsby-based frontend with animated visual storytelling using GSAP.

Humboldt-Universität zu Berlin

Supported development for Quouch, through debugging and ideation of sign-in and onboarding features. Helped improve user experience and logic around authentication flows.

GPG Granit

Designed and implemented frontend enhancements for an internal order system, improving usability, responsiveness and visual clarity.

Web Development Instructor | 2019 to now

Le Wagon 2019 - now | **Weißensee Academy of Art Berlin** 2021

Taught full-stack web development with a focus on Ruby, JavaScript, databases, and web architecture. Contributed to curriculum development and ran workshops on programming fundamentals and best practices.

Key Account Project Manager · Doctolib | 2018

Managed onboarding and support for large healthcare clients. Worked closely with operations and product teams to align technical setup with client needs.

Senior Onboarding Manager · Mondocteur.fr | 2017 - 2018

Led audits and SaaS configuration for clinics; provided training and support to medical teams. Mentored junior staff and contributed to the internal Salesforce implementation.

SaaS Consultant · Cognizant | 2015 - 2016

Organizational Change Management for a global CRM deployment

Key Achievements

Upgraded a Rails 6.1 app to 7.1 with Propshaft, jsbundling-rails, and cssbundling for a modern asset pipeline.

Integrated Tesla's new vehicle-command protocol via SDK and HTTP proxy to enable remote vehicle control.

Implemented scalable storage with MongoDB alongside existing PostgreSQL database

Contributed to Le Wagon's JavaScript curriculum, used by 40+ campuses worldwide.

Designed a programming module for non-technical students and taught 50+ full-stack dev classes.

Skills

Programming Languages

Ruby, SQL, JavaScript (ES2015++), HTML, CSS

Libraries and frameworks

Ruby On Rails, React, Stimulus, Hotwire, Tailwind CSS, Bootstrap, Jekyll, Gatsby

Tools and platforms

Git, Github, Heroku, Netlify, PostgreSQL, PgAdmin, Sidekiq

Others

User Training, Project Management, Programming Instructor, Educational Content Developer

Education

Linux Foundation (ongoing)

Open Source Development, Git and Linux, Cybersecurity Essentials

Le Wagon

Web Development Bootcamp

Neoma Business School

Master in Management

Languages

French (native), **English** (C1)
German (B1),
Italian (A2), **Spanish** (A2)

Interests

Trekking, diving, RPG, science fiction, knitting, craft beers, German bureaucracy
